ABOUT THE COURSE

Do you know that only a pharmacist/doctor can be a pharmacovigilance officer in UAE!!

With the implementation of Arab PV Guideline, it will be mandatory for all pharmaceutical companies/Drug stores/manufacturing facilities to appoint pharmacovigilance officers as Local Safety Officer in their firms.

The UAE has over:

150+

Drugs stores dealing with conventional medicines

50+

Scientific offices that represent global pharmaceutical offices.

20+

Manufacturing facilities

8000+

Products marketed

Although the UAE has well qualified pharmacists in the region, there is a lack of well-trained pharmacovigilance professionals available to meet the increasing demands of the region.

This Course is mainly prepared for Healthcare professionals who wish to work as Pharmacovigilance officers in UAE and thereby open up a new career pathway. This course gives you the fundamental idea on the basics of Pharmacovigilance, with elaboration on the roles and responsibilities. This training also covers Safety data exchange agreements, monthly reconciliation, ADR reporting etc. Importantly this course explains on the basic requirements to get a 'PV officer' approval from the UAE MOH.
